

4U Ticketing System Sprint Retro Notes

Team: **Group 3**

Sprint: **2**

Date: **15/5/2019**

Attended:

Scrum Master: **Cheng Long Liew**

Product Owner: **Larry Ho**

Development Team: **Cheng Long Liew, Larry Ho, Yixuan Wang, Jingbin Yin, Boyu Yuan**

1. Things That Went Well

- More Product Backlogs items complete

2. Things That Could Have Gone Better

- Lack of communication in general
 - Tasks' status
 - Tasks assigned
- Commits to Github repository infrequent
 - Unable to verify task assigned or status
- Sprint meetings need to start early to assign tasks
 - Meeting started on 2nd Wednesday; three days before sprint due date
- Less product backlog items(?) to implement to project in one sprint

3. Things That Surprised Us

- All members were not all available to meet this week
- Members are not unanimous in implementing a database
 - Some prefer using text file to hold information for placeholder
- Members still need more time to finish some tasks

4. Lessons Learned

- Starting tasks earlier
- Discussion starting earlier

5. Final Thoughts

- Try to start sprint progresion earlier
- Attempt to communicate clearly to each other
- Continue to complete Product Backlog Items at a steady pace
